# Recycling Collection Event

**PRESENTED BY:** City of Kirkland & King County

**WHAT:** Residential Collection Event

WHERE: Houghton Park & Ride (NE 70th St & 116th Ave NE)

WHEN: Saturday, April 24, 9 AM to 3 PM

Clean out your garage and safely recycle items that normally cannot be left at the curb with your regular Waste Management pick-up service or recycled readily through product stewardship programs. Examples of items that you can bring are: tires, motor oil, batteries, clothing, porcelain toilets and sinks, electronic equipment and computer peripherals, and bulky wood. **No paint of any kind will be accepted.** 

Important note!!! Due to the new E-Cycle Washington Program, we will no longer accept televisions, desktop and laptop computers, and computer monitors at our Kirkland Recycling Collection Events.

We will still continue to accept all other electronic devices at our events to

We will still continue to accept all other electronic devices at our events to include cell phones, printers, scanners, fax machines, mice, and keyboards.

For more information on the E-Cycle Washington Program or to find a convenient free collection site near you, please visit <a href="https://www.ecyclewashington.org">www.ecyclewashington.org</a>.

Not sure what to do with those hard to recycle items? Visit King County's "What Do I Do With..." web site from <a href="https://www.ci.kirkland.wa.us/recycle">www.ci.kirkland.wa.us/recycle</a>.

# Fluorescent tubes and bulbs can be recycled at this event! (limit 10 tubes/bulbs per person)

User fee Items (cash only):

Propane tanks (empty, residential only)
Small camping propane tanks (empty)

Refrigerators/freezers/ household air conditioners

\$5/each \$5/each \$5/each

\$25/each

For tips on securing your load, please see kingcounty.gov and enter "secure your load" or call (206) 296-4466.

E-CYCLE

\* Restrictions apply and some items are not collected. User fees cover the cost of proper processing and recycling. All items collected will be recycled. View the flyer at <a href="www.ci.kirkland.wa.us/recycle">www.ci.kirkland.wa.us/recycle</a> or call the Recycling Hotline at (425) 587-3812 for more information.

Funding provided by the King County Solid Waste Division, King County Local Hazardous Waste Management Program, and the Washington State Department of Ecology.

Public Works ngton 98033

Fluorescent bulbs and tubes cannot be disposed of in the garbage in King County and should be recycled. For a list of local recyclers, visit <a href="https://www.ci.kirkland.wa.us/recycle">www.ci.kirkland.wa.us/recycle</a> (click on

Fluorescent Bulb Recycling) or www.takeitbacknetwork.org.

# Recycling Kits Available to Help You Recycle

The City of Kirkland is making it easier for condo owners and apartment tenants to recycle. Your building complex is eligible to receive free onsite recycling assistance and informational presentations for homeowners associations and apartment groups. But wait, there's more! The City also provides recycling kits for property managers and condo associations to distribute to residents and owners.

Recycling kits contain items to make it easier to collect recycling, know what is recyclable and to handle unusual items for recycling (such as computers). The kits consist of:

- A durable collection container/bag to transport recyclables outdoors to the recycling cart or dumpster,
- A refrigerator magnet listing what is and is not recyclable,
- A resource sheet on where to take hard-to-recycle items,
- Water conservation tools, including a faucet aerator.

If your property needs recycling kits or recycling assistance, please contact your building owner, property manager or condo association and ask them to contact the City of Kirkland at (425) 587-3812 or recycle@ci.kirkland.wa.us. Supplies are limited.

Presorted Std US Postage Paid Kirkland, Wa Permit No. 268

# Get on Board!

The City of Kirkland is proud to introduce its one of a kind Food Scrap Recycling Program for Apartments and Condos. Join the many other Kirkland apartment residents and condo owners already recycling their food scraps and food-soiled paper instead of sending them to the landfill. Food scraps and other compostable materials make about 30 percent of residential garbage and, when recycled, can be reconstituted into compost within eight weeks — a soil amendment that enriches soil and improves plant health.

# Qualified multifamily properties are eligible to receive all of this for free:

- Lined food scrap recycling carts (weekly or bi-weekly service)
- Kitchen food scrap containers
- Compostable bag samples
- Educational materials and signage
- Onsite presentations and training

For more information or to apply online, please ask your property manager, homeowners' association, or building owner to visit <a href="www.ci.kirkland.wa.us/recycle">www.ci.kirkland.wa.us/recycle</a> and click on "Food Scrap Recycling for Apartments and Condos." For questions, call Kirkland Recycling Hotline at (425) 587-3812 or email <a href="mailto:recycle@ci.kirkland.wa.us">recycle@ci.kirkland.wa.us</a>.

# **Puget Sound Starts Here**

Puget Sound starts with us. It starts anywhere in the Puget Sound region. It starts in our yards, in our parks, and in our streets. It starts wherever we are. Any chemicals, litter, or pet waste that we leave on the ground can eventually end up in Puget Sound. What we do "here" has serious impacts on our local waterways and eventually on Puget Sound. Visit www.pugetsoundstartshere.org to learn more.

### **GET INVOLVED!**

### **Super Scoopers**

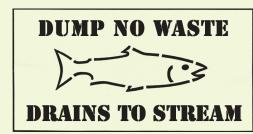

Are you interested in helping to keep our parks clean and healthy? Do you like talking with people? If you answered "yes" to these questions, we need your help! Join the "Super Scoopers" to help educate dog walkers on the importance of cleaning up after their pets. Volunteer training and materials are provided.

### **Storm Drain Marking**

Did you know there are over 9,000 storm drains on our streets in Kirkland? Did you know the water that enters these drains flows to our local creeks, lakes and wetlands without any treatment? That

means that a rain storm or water from a hose can wash pesticides from our lawns or soap from our driveway car washes down a drain and eventually into our local waterways.

Volunteer to mark the drains in your neighborhood with the message "Dump No Waste, Drains to Stream." Materials are provided.

### **Restoration Events**

Help improve the health of our local stream buffers. Spend the day maintaining restoration sites. Work includes planting native plants and removing invasive plants.

### **NO EXPERIENCE NECESSARY!**

- Juanita Beach Park May I, 9 AM IPM
  Join us in maintaining this beautiful restoration
  project along Juanita Creek.
- Everest Park May 22, 9 AM IPM
   Help restore the native plant population along Everest Creek.

For more information or to sign up for any of these programs or projects, please contact Betsy Adams (425) 587-3858 or <a href="mailto:badams@ci.kirkland.wa.us">badams@ci.kirkland.wa.us</a>).

# Reduce Waste this Earth Day

April 22nd is the 40th anniversary of Earth Day. What a great time to focus on reducing waste and reusing materials! Here are some ideas to get you started:

• Purchase Durable Products: Reusable, durable products reduce our demand for raw materials. For example, use reusable water bottles and fill with tap water, instead of purchasing plastic single use water bottles.

- Purchase Concentrated Products: They require less packaging and use less resources to transport to stores. There are many options available for purchasing items in concentrated form. Look for items such as laundry detergents, cleaning products, and juices offered in concentrated form.
- <u>Visit Ecodeals.org</u>: Use the "waste calculator" to determine the impact of your purchasing choices. Find tips and resources to help you reduce your environmental impact.

- o Get off credit offer lists: Call 1.888.5OPTOUT
- o Sign up for the Mail Preference Service: www.dmachoice.org/dma
- o Opt out of paper catalogs: www.catalogchoice.org
- o Find more tips: your.kingcounty.gov/solidwaste/wasteprevention
- Donate Unwanted Reusable Items: Instead of tossing items you no longer want, donate them. A number of locations in Kirkland accept reusable materials for donation, including Totem Lake Goodwill (12221 120th Ave NE) and Value Village (12515 116th Ave NE).

• <u>Host Zero Waste Parties</u>: Whether it is a birthday party, dinner party or a cook out, there are many easy ways to reduce waste. Use reusable dishes, cups and utensils whenever possible. For more ideas, visit <a href="https://www.ci.kirkland.wa.us/recycle">www.ci.kirkland.wa.us/recycle</a> (click on Waste Reduction).

## **Comments**

The City of Kirkland would like to hear your comments about this newsletter or your suggestions for future issues. Please call (425) 587-3907 or email <a href="mailto:vsheth@ci.kirkland.wa.us">vsheth@ci.kirkland.wa.us</a>.

# Car Washing

The family car is parked in the driveway, a bucket full of soapy water sits on the pavement, and a hose lies uncoiled on the ground ready to wash away the grime. It's a common image during the spring and summer months. While our elbow-grease might produce a shiny, clean vehicle, driveway car washing also has some unfortunate and unintended consequences.

Few people realize that washing a car in the driveway is one of the most environmentally un-friendly chores. Unlike our household wastewater, which goes to the sanitary sewer for treatment, this wash water – a mixture of water, soap, oil, dirt, and other pollutants - runs down the street and into the storm drain. It then dumps into the nearest lake, stream, or wetland with no treatment. This filthy cocktail is harmful, even poisonous, to fish and wildlife and can wreak havoc on ecosystems.

### Commercial car washes treat wastewater

The most environmentally-friendly option is to use a commercial car wash – automatic or self-serve. Car wash facilities are required to send their wastewater to the sanitary sewer, so it gets treated before being sent back into the great outdoors. Commercial car washes also minimize water use and most recycle their water, using 60 percent less water for the whole process than a homeowner uses just to rinse their vehicle.

# Why Save Water? Every Drop Counts...

### Save Water, Save Money

By making just a few simple changes to use water more efficiently, you could save about 30 percent per year on your water and sewer bill. Using water more efficiently reduces the need for costly water supply infrastructure investments and new wastewater treatment facilities.

If all U.S. households installed water-efficient appliances, the country would save more than three trillion gallons of water and more than \$18 billion dollars per year! (Environmental Protection Agency)

### Save Water, Save Energy

It takes a considerable amount of energy to deliver and treat the water you use everyday. American public water supply and treatment facilities consume about 56 billion kilowatt-hours (kWh) per year–enough electricity to power more than five million homes for an entire year. Saving water not only reduces the energy required to supply and treat public water supplies but also can help address climate change.

If one out of every 100 American homes retrofitted with water-efficient fixtures, we could save about 100 million kWh of electricity per year—avoiding 80,000 tons of greenhouse gas emissions. That is equivalent to removing nearly 15,000 automobiles from the road for one year! (EPA)

### **Water Efficiency and the Environment**

Depleting reservoirs and groundwater can put water supplies, human health, and the environment at serious risk. Lower water levels can contribute to higher concentrations of natural or human pollutants. Using water more efficiently helps maintain supplies at safe levels, protecting human health and the environment.

For tips on how to save water, visit <u>cascadewater.org</u>.
